Engenharia de Software - 2024/25

Lab#3 – Features, Scenarios, and Stories

1. Explain why domain knowledge is important when identifying and designing product features.

2. Explain why it is helpful to develop a number of personas representing types of system user before you move on to write scenarios of how the system will be used.

3. Using the input/action/output template, describe two features of software that you commonly use such as a text editor.

4. Suggest how a development team might avoid 'feature creep' when they are faced with many different suggestions for new features to be added to a product.

5. Explain the figure below, related with the feature design.

Nuno Pombo | Carlos Cunha
